

Project Logistics

Our project logistics division offers specialised knowledge, commitment and flexibility to execute complex cargo movements.

With our global network, we have the experience and capabilities for safe and timely delivery of your project cargo shipments worldwide.

Our expertise includes transporting oversized and complex items from the oil and gas, mining, pulp and paper, automotive, construction, and power and energy industries.

- Multi-axle modular platform trailers (capacities of up to ~600 tonnes)
- Heavy-haul-rated prime-mover tractors
- Specialised transport of long loads (e.g. bridge beams, windfarm components)
- Specialised transport of oversized tanks/cylinders
- Specialised jacking/lifting gear for extraction and installation of machinery/equipment (e.g. transformers, stationary engines)
